

NAME THAT MAMMAL

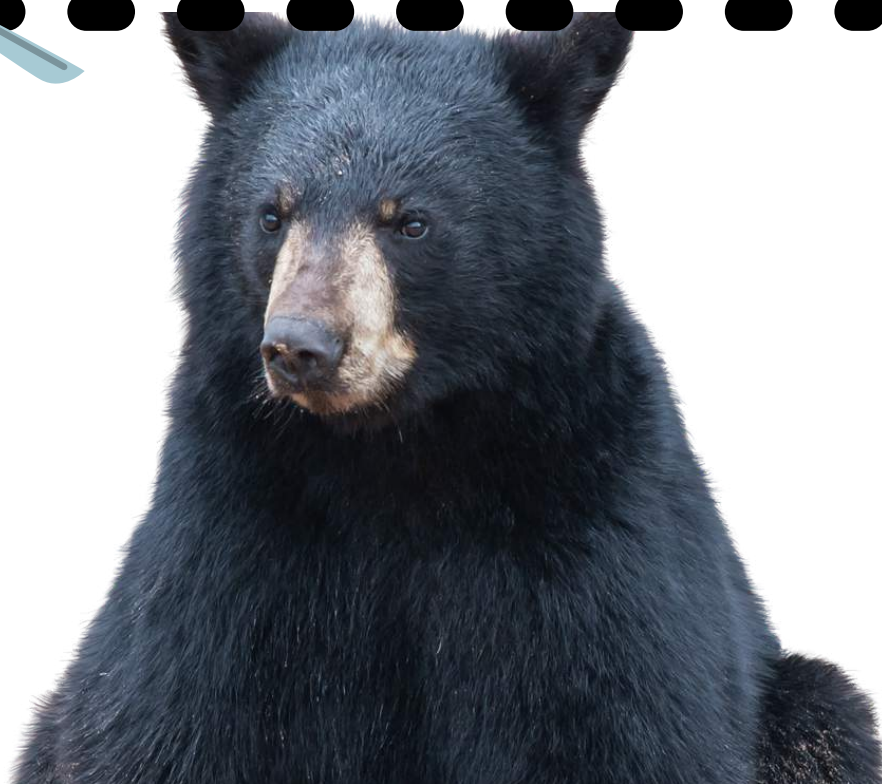

2+ PLAYERS

ALL MAMMALS IN THIS GAME HAVE BEEN FOUND AT THE QUEEN'S UNIVERSITY BIOLOGICAL STATION

1. Cut out the mammal photos below and lay them face down.
2. Set a timer for 30 seconds.
3. Player 1 holds up the photo to their forehead, without looking at the photo, so the other players can see the mammal.
4. Other players can now describe the animal's sounds, movements, adaptations, and physical characteristics without giving away the name of the mammal. Player 1 attempts to guess the mammal.
5. Once a mammal has been correctly guessed, player 1 may select another card until their 30 seconds runs out.
6. Each player completes steps 2-5. The player who correctly guesses the most mammals within 30 seconds wins!
